

THE JOB SPEAKER

A unique multi-application Single Stereo Speaker

Based on the research made by Stereolith in Switzerland for professional playback with absolute Stereo accuracy, the JOB Speaker offers the unique advantage of an hyper-realistic stereo imaging originating from a single speaker enclosure.

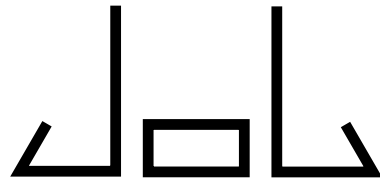

Small and extremely easy to locate in any room, the JOB Speaker provides a much more natural space recreation than any set of two speakers even of highest quality.

Thanks to the specific principle used, the stereo image is also far less distorted when the listener moves across the room.

This makes the JOB Speaker the ideal speaker for large audiences as in Home-Theater applications. From a single TV-Top Speaker, up to multi-channel high-end big systems were the JOB speaker find its best role in both front and rear channels, the JOB provides a unique naturalness in space recreation.

It is also exceptionally suited for cramped space situations lacking the possibility of locating stereo speakers properly like in all kinds of desktop computer Multimedia applications.

Coupled with the unique dynamics and transparency of the JOB amplifier, the JOB speaker represents the best transportable mini Stereo System possible for music-lovers. And probably one of the most accurate for remote professional applications.
